DIGITAL MARKETING - ONLINE TRAFFIC

Blossoms of Tweed

One of our favourite and most rewarding online marketing challenges, was to create an online marketing plan to save a local florist business from going under due to increased national competition in the area. We did our research and picked apart the competitions keywords and targeted new keywords that would best suit our clients needs. Although we can't divulge what those where, we can say that we dominated those niche markets and number one rankings of keywords. We can't take all the credit our client and her team worked hard with us on our plan to help push the business success too the highest in sales ever seen though the covid lock down period.

Brendan Duggan

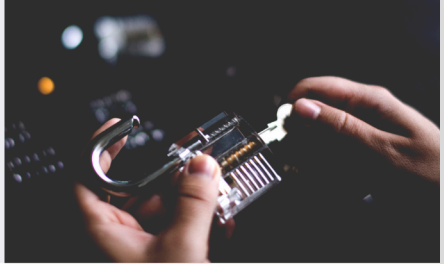

Brendan Duggan and his team has a fantastic reputation in the Southern Gold Coast and Tweed Heads area for everything and anything to do with locks and keys. Brendan first came to us with the problem of his competitors gaining all the work online. Although he had an amazing reputation, he was no longer picking up any new customers and he had no online presence under any keywords in his local area. We worked with Brendan to create a plan that would drive traffic in three main areas and rank number one of Google with in three months. Brendan and his team worked hard on reputation management and reviews and the plan worked and we currently still maintain these rankings for Brendan and his team. He is great to work with and always thankful of our commitment to our work.

HAPPY CLIENTS

Bringing security and peace of mind is our mission.

"1) Brendan answered his phone 2) He was very helpful & had a young man here within 45 minutes. 3) The trade arrived on time, was respectful & very pleasant & then accommodated a neighbour's issue after mine. The price was also reasonable, no stacking the invoice. Most happy Brendan & Co & will certainly recommend you for your service."
